NOTES

- Daily physical activity blocks are scheduled for all groups from 3:30-4:00pm rotating in the gym and outdoor spaces!
- As a reminder, children should be picked up after their enrichment time to maximize their out-of-school-time learning.

ENRICHMENT CLASS DESCRIPTIONS

CLASS	DESCRIPTION
Science Lab-Human Body Edition	Dive inside the incredible human body as we explore how each system works together to keep us moving, thinking, and growing! Each week, students become scientists, builders, and detectives as they create hands-on models and try exciting experiments. By the end, they'll discover just how amazing their own bodies really are!
Artful Creations	Unleash your imagination in Artful Creations, where winter magic comes to life in every project! From snowy paintings to frosty crafts, kids will explore new materials and techniques while creating seasonal masterpieces. By the end, they'll have a sparkling gallery of winter-inspired art to share and celebrate!
Messy Explorers - Creative Chaos	Step into the world of Messy Explorers, where curiosity leads to colorful, squishy, and oh-so-fun experiments! Each week, kids will dive hands-first into goo, fizz, slime, and sensory surprises while learning through play and creativity. By the end, they'll be fearless, messy scientists ready to explore anything that comes their way!
Classic Cooking-Dollar Store Edition	Get ready to whip, mix, sprinkle, and taste your way through our Classic Cooking- Dollar Store Edition! Each week, young chefs will turn simple ingredients into delicious creations while learning real kitchen skills in the most fun, hands-on way. From mug cakes to mini pizzas, this enrichment proves you don't need fancy food to make big, tasty magic!
Friday Favorites	Each week, the kids get to vote on their favorite activities from a list, and then they dive into an afternoon full of hands-on fun and creative exploration!
Construction Zone	The Construction Zone is where creativity has no limits! With less formal instruction, students have the freedom to explore, tinker, and create their own projects. Whether you love building structures, forts, cities or gadgets, or this is the place to make it happen. No matter your skills, there's something for every one.
Imagination Zone	Some children learn best through their own independant exploration, and we are OK with that. Students needing a break from adult led activities are invited to escape into their imagination and exlore new themes through play.
Design Zone	Kids might think they know all the answers, and sometimes they actually do. In this child lead zone, they make the rules and call the shots as they choose to work independantly, or collaboratively to design solutions to common daily challenges. Weather they are designing a solution to broken crayons, or solving world hunger, the design zone offers everything needed to design and create the next big product.
